

**LUCY**

Nearly all experts agree Lucy was just a 3 foot tall chimpanzee.

**HEIDELBERG MAN**

Built from a jawbone that was conceded by many to be quite human.

**NEBRASKA MAN**

Scientifically built up from one tooth, later found to be the tooth of an extinct pig.

**PILTOWN MAN**

The jawbone turned out to belong to a modern ape.

**PEKING MAN**

Supposedly 500,000 years old, but all evidence has disappeared.

**NEANDERTHAL MAN**

At the Int'l Congress of Zoology (1958) Dr. A.J.E. Cave said his examination showed that this famous skeleton found in France over 50 years ago is that of an old man who suffered from arthritis.

**NEWGUINEA MAN**

Dates way back to 1970. This species has been found in the region just north of Australia.

**CROMAGNON MAN**

One of the earliest and best established fossils is at least equal in physique and brain capacity to modern man... so what's the difference?

**MODERN MAN**

This genius thinks we came from a monkey.

*"Professing themselves to be wise they became fools."
(Romans 1:22)*

Evolution Definitions

- Cosmic Evolution:** the origin of time, space and matter.
- Chemical Evolution-** the origin of higher elements from hydrogen. Where did all the other elements come from?
- Stellar and Planetary evolution-** Origin of stars and planets. Never seen a star form but seen many blow up.
- Organic Evolution-** Origin of Life. (From a Rock?!)
- Macro-Evolution-** Changing from one kind into another.
- Micro-Evolution-** Variations within kinds (mutations, big/little dog, etc.). **Only this one has been observed.**
